

Richard L. Learn (#3265)

Trenton, N. J.

I found this copy of perfin pattern Des. 7 on a cover with the corner card of Cook's Linoleum. The perfin pattern arrowhead matches the company's trade mark. *The Catalog of United States Perfins*, 1979, does not list a user for this pattern; however, the Trenton location is listed. The postmark is April 30, 1910 and the arrowhead

perfin is clearly visible on the two cent Washington stamp.

A copy of the illustration has been forwarded to John Randall, US Catalog Editor, in hopes that the identification will be included in the next edition of the US Catalog.
